

AFDI 2.0 Critical Design Review Action Items & Decisions

	Action Item	Date	POC
1	Sub-domain credential support patch to Mark Khan (SOCOM)	TBD (see #7)	Capt Durante
2	Send a copy of local Audit Reduction Tool to PMO for evaluation.	13 Oct 00	Steve LeFevre (SOUTHCOM)
3	TMP Review by end of next week	29 Sep 00	Capt Durante
4	Determine which local system files to be transferred via the CTC.	Done	Mark Olson
5	Look at publishing more design data to web site	13 Oct 00	Olson/Durante
6	AFDI News Group/Better Website	1 Dec 00	Capt Durante
7	Sub-domain aware credential support commitment date	29 Sep 00	Mark Olson
8	Check Seg Security Tool and get PMO information	13 Oct 00	John Whittenton
9	Post VISE tool for FTP download	13 Oct 00	Mark Olson
10	Begin common "Hacker Tool" capabilities & impacts	1 Dec 00	Capt Durante
11	Purchase hardware disk cloner for PMO to evaluate. Talk to Sal Calfa for more info (USSPACECOM)	1 Oct 00	Capt Durante
12	Get some PKI "answers" regarding IC community	13 Oct 00	Steve Fager

	Decision	POC
1	The PMO will not specifically support moving of home directories (but will not prevent it either)	Capt Durante
2	The CTC shall support YP compatibility mode (add -Y -B flags to /etc/rc2.d/S71rpc on the EMULYP line. Adding the -Y flag sets yp emulation mode. The -B flag provides ypserv compatible DNS forwarding.	Mark Olson
3	Must be able to save CTC data to device other than tape (Mark Khan, SOCOM)	Mark Olson
4	No "clear-text" passwords will be allowed for AFDI 2.0	Capt Durante
5	AFDI Web Server may reside on non-COE box	Mark Olson
6	PMO will drop support for static home directories, but will not do anything to prevent that configuration. In other words, PMO will no longer test that specific configuration.	Capt Durante
7	PMO shall drop support for software-based disk cloning	Capt Durante
8	The software shall flag existing accounts (with same uid) during CTC transition before overwriting them.	Mark Olson
